

**Study Title:
Nature and Correlates of Romantic Attraction to Children**

Hello,

You are invited to participate in a research study investigating the nature and correlates of romantic attraction to persons across physical maturity stages, ranging from infants to the elderly. You will be asked to respond to a variety of questions about your experiences of sexual and romantic attraction to persons across age/maturity stages, your personality, mental health and wellbeing, and your interactions with children (including convictions or arrests for child sexual offenses).

Eligible participants are **age 18+, understand English**, and are **sexually and/or romantically attracted to prepubescent and/or pubescent children**. (Note: You are eligible and encouraged to participate whether you experience only sexual but not romantic attraction to children, only romantic but not sexual attraction to children, or both.)

Your participation is completely **voluntary, confidential, and anonymous** (no identifying information will be requested). It involves answering an **online, closed-response (e.g., multiple choice) survey** on the SoSci Survey platform that will take approximately 30 minutes to complete. As a thank you for participating, you may choose to be entered in a draw to win one of three \$100CAD Amazon eGiftCards.

If you are interested in participating or learning more, please click this link:

You are also welcome to contact the researchers via email if you have questions. (You may wish to use a pseudonym and email address that do not suggest your identity to protect your privacy.)

We sincerely thank you for your interest, and we encourage you to share this invitation with any fellow minor-attracted people who may be interested!
